

Information sheet on the acquisition of additional credits for MRA students with a 180 ECTS Bachelor degree

For students of the Master's degree program "Regulatory Affairs" who have only acquired 180 ECTS credits as part of their Bachelor's degree and need to acquire 30 additional ECTS credits during their MRA studies, we currently cooperate with two other departments at TH Lübeck. They offer each an online Bachelor's degree program, from which MRA students can take corresponding courses.

Information on the degree programs, module descriptions, etc. can be found below.

Once a selection of subjects has been made, it must be clarified individually with the head of the MRA program whether these can be recognized.

If you have confirmation from the head of program, you can contact the coordinator Ms. Silke Venker and the respective contact persons from the departments to take care of the organization or to clarify the activation of the modules.

As a rule, a fee of 95 Euro is charged for each additional subject per semester.

Additionally, or alternatively, it is possible to order courses via the Oncampus GmbH online store www.oncampus.de. In most cases, the participation fees stated there must be paid. The selected courses must end with a certificate in order to be recognized. In any case, it must be agreed with the head of program whether the content of the selected courses is suitable for MRA and can therefore be recognized.

If you have any questions, please do not hesitate to contact:
