

Module: Secure Networked Control Systems

Level	Master	Short Name	SNCS
Responsible Lecturers	Oliver Stecklina, Prof. Dr.		
Department, Facility	Electrical Engineering and Computer Science		
Course of Studies	Applied Information Technology, Master		
Compulsory/elective	Elective	ECTS Credit Points	5
Semester of Studies	(Unspecified)	Semester Hours per Week	4
Length (semesters)	1	Workload (hours)	150
Frequency	WiSe	Presence Hours	60
Teaching Language	German/English	Self-Study Hours	90

The following section is filled only if there is **exactly one** module-concluding exam.

Exam Type	Oral Exam	Exam Language	German/English
Exam Length (minutes)		Exam Grading System	
Learning Outcomes	<p>After successfully completing the course, students will be able to:</p> <ul style="list-style-type: none"> • explain the basic terms of network security and classify them in the area of industrial control systems, • structure attack techniques and name possible countermeasures, • analyze and evaluate industrial systems with regard to possible weaknesses and vulnerabilities, • evaluate and implement countermeasures for industrial control systems taking into account the fields of application, and <p>integrate reactive and preventive IT security measures into industrial control networks.</p>		
Participation Prerequisites			

The previous section is filled only if there is **exactly one** module-concluding exam.

Consideration of Gender and Diversity Issues	<ul style="list-style-type: none"> ✓ Use of gender-neutral language (THL standard) ✗ Target group specific adjustment of didactic methods ✓ Making subject diversity visible (female researchers, cultures etc.)
Applicability	The module can be used within the master of computer science.
Remarks	

Module Course: Secure Networked Control Systems (Lecture)

(of Module: Secure Networked Control Systems)

Course Type	Lecture	Form of Learning	Presence
Mandatory Attendance	no	ECTS Credit Points	3
Participation Limit		Semester Hours per Week	3
Group Size		Workload (hours)	90
Teaching Language	German/English	Presence Hours	45
Study Achievements ("Studienleistung", SL)		Self-Study Hours	45
SL Length (minutes)		SL Grading System	

The following section is filled only if there is a course-specific exam.

Exam Type		Exam Language	
Exam Length (minutes)	120	Exam Grading System	
Learning Outcomes			
Participation Prerequisites			

The previous section is filled only if there is a course-specific exam.

Contents	<p>With the introduction of Industry 4.0, the security of networked control systems is becoming increasingly important. Such a system can only be effectively used by a company in an industrial environment if the data generated by the system is reliable or it can be guaranteed that commands to the system will arrive unaltered and will also be executed as required.</p> <p>The module deals with possible scenarios that arise with the increasing networking and autonomy of systems and gives solutions to install security in such a system or to develop secure systems,</p> <p>Part 1: Basics of network security</p> <ul style="list-style-type: none"> • Basic terms of IT security • Attacks and countermeasures in communication networks <p>Part 2: Information Security Management Systems (ISMS)</p> <ul style="list-style-type: none"> • Safety Analysis • Security Management <p>Part 3: Industrial control technology</p> <ul style="list-style-type: none"> • Basics • Security Analysis • Attack Models <p>Part 4: Preventive and reactive safety in industrial control technology</p> <ul style="list-style-type: none"> • Firewalls • Intrusion detection
-----------------	---

	<ul style="list-style-type: none"> • Patch Management

Module Course: Secure Networked Control Systems (Practical Training)

(of Module: Secure Networked Control Systems)

Course Type		Form of Learning	Presence
Mandatory Attendance	no	ECTS Credit Points	2
Participation Limit		Semester Hours per Week	1
Group Size	12	Workload (hours)	60
Teaching Language	German/English	Presence Hours	15
Study Achievements ("Studienleistung", SL)	Practical Training	Self-Study Hours	45
SL Length (minutes)		SL Grading System	Pass

The following section is filled only if there is a course-specific exam.

Exam Type		Exam Language	
Exam Length (minutes)		Exam Grading System	
Learning Outcomes			
Participation Prerequisites			

The previous section is filled only if there is a course-specific exam.

Contents	In this practical training, the knowledge of the lecture should be deepened in practical examples. Be in group work <ul style="list-style-type: none"> • Network protocols of industrial control systems will be analyzed, • Network filter will be set up, and Procedures for secure patch management will be implemented.
